Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsuyuguchi (USP 6,289,397) in view of Milley et al. (USP 6,738,856). Tsuyuguchi discloses the claimed invention Tsuyuguchi (see figure 1) discloses a voltage converting unit (30), a power-controlling unit (28), a USB interface circuit (29), and a switch (34b) except for having a switch connected to the power controlling unit to control the power supply output to the USB interface. Milley discloses that it is known in the art to provide a switch connected to the power-controlling unit to control the power supply output to the USB interface. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to provide the switch connected to the power-controlling unit to control the power supply output to the USB interface of Milley with the

peripheral storage device of Tsuyuguchi, in order to exert a more direct control over the flow of power from one device to another.

4. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsuyuguchi (USP 6,345,364) of Milley et al. (USP 6,738,856). Tsuyuguchi and Milley disclose the claimed invention except for a power output indicator indicating the status of power using LED or LCD display devices. It would have been obvious to one having ordinary skill in the art at the time the invention was made to a power output indicator indicating the status of power since it was known in the art that any type of display to indicate the power status of a device is well known to one of ordinary skill in the art.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bao Q. Vu whose telephone number is (571) 272-2088. The examiner can normally be reached on Monday-Fridays, 8:00AM- 5:00PM.
